State of Washington
Department of Ecology
Waste water Discharge Permit Fee Program
P.O. Box 5128
Lacey, WA 98503-0210

Dear Sir,

Ash Grove Cement Company has until recently operated a settling pond at the Southwest corner of our property at 3801 E. Marginal Way South, Seattle, Washington 98134. The settling pond has operated under State Waste Discharge Permit #5162. The permit is effective until June 30, 1992.

This letter is intended to inform the Washington Department of Ecology that this settling pond is no longer in use. The pond area has been reclaimed and the pond no longer exists. As a result, we will not be renewing permit #5162 when it expires.

The use of the pond for storm water containment has been replaced with a system permitted with Metro, Municipality of Metropolitan Seattle, under the Waste Discharge Authorization No. 296.

If you require additional information, please advise.

Thank you.

Gerald J. Brown
Safety & Environmental Manager

Mr. Gerald J. Brown
Safety & Environmental Manager
Ash Grove Cement Company
3801 East Marginal Way, South
Seattle, WA 98134

Dear Mr. Brown:

Re: State Waste Discharge Permit No. 5162; Ash Grove Cement Company

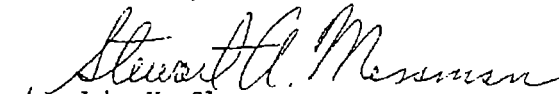

This Department has received information that you are no longer using the settling pond for storm water containment and it has been replaced with a system permitted with METRO. In view of the foregoing, your state waste discharge permit No. 5162 is canceled.

Should you anticipate a discharge of wastewater from this source into waters of the state, you are required to submit an application for a waste discharge permit to the Department of Ecology at least 60 days prior to the anticipated discharge.

The discharge of the treated process wastewater to the METRO sewer system will continue to be regulated by the City of Seattle Pretreatment Program. Your facility may also be required to apply for a storm water permit under the provisions of 40 CFR 122.26(b)(14).

If you have any questions regarding this cancellation letter, please telephone Gerald Shervey at (206) 649-7215 at our Northwest Regional Office.

Sincerely,

for 
John H. Glynn
Water Quality Supervisor
